Hey Matt-

Here's your answer.

**Subject:** RE: TPH Fraction PRGs

The C10-C12 TPH aliphatic PRG is remaining in the FS. This is from the BERA and was a contaminant posing significant risk. There was no basis to include other fractions (i.e., supplemental risk assessment or ARAR).

Hi Eva,

We are running into some pushback from some petroleum facilities regarding monitoring for the C10-C12 TPH PRG in groundwater. I understand that EPA is still making changes to the PRG table for the updated FS. Can you check in with your team as to whether they expect changes to this PRG in the final table (e.g., drop the TPH PRG, keep it as is or add the other fractions). If we have some sense of where EPA is going to end up on this issue, it will help with our upland facility negotiations.

Thanks,

Matt McClincy
